

Data Pro Accounting Software has worked out arrangements with **INFOR** of Canada, who is the maker of the popular “**F9**” software product. **F9** is an easy-to-use financial reporting tool that dynamically links **Microsoft Excel** to **Data Pro’s Infinity POWER General Ledger** data files. Everything you know about spreadsheets can now be applied to the financial reports you create using **F9**!

**F9** offers a powerful feature package:

- Excel-based functionality ensures ease of use
- Formula Calculations eliminate re-keying of numbers
- “Business Intelligence” Reporting offers KPIs, Table and Pivot Table Analysis
- Report Publishing, Drilldown Viewer and Analysis
- Report Analysis diagnoses errors in a report
- Drill-Down capability by Account Segments, Transactions, Pivot Details
- Budget Write-Back to the GL
- Consolidations over Multiple Companies, Multiple Years and Databases
- Ad-hoc reporting using the Report Wizard
- Scheduling, Report Calculation, Distribution and E-mail

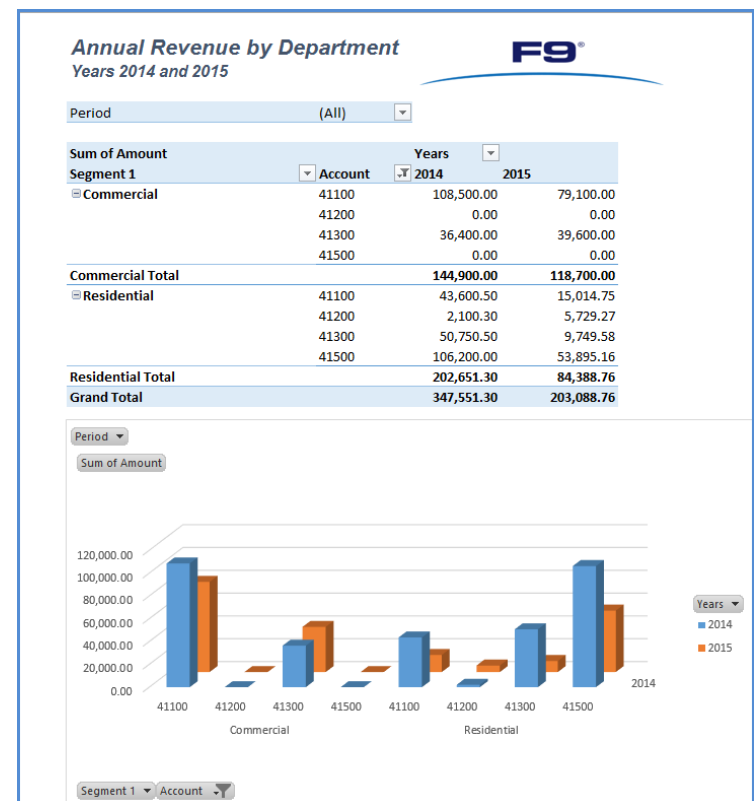

**F9** does all of this through a dynamic link to the General Ledger, ensuring that all numbers are timely, consistent, and complete. You will never have to manually create and customize your spreadsheets again. With a few simple steps you will be able to create the reports you need quickly and easily. You can manipulate your reports and refresh simply by pressing the **F9** key on your keyboard.

**F9** solutions maximize accounting resources, enhance productivity and deliver in-depth flexible reporting for improved profitability. Out-of-the-box queries and reports get your personnel up-and-running quickly.

Filter reports by any criteria you require and change them with simple point-and-click procedures. **F9** allows you to create financial reports the easy way, and without technical help. Define and design your report quickly and easily through drop-down menus and graphics. Within minutes, you can create any report required – whether in summary or detailed – for any designated date range.

**F9** employs a combination of financial based formulas in Microsoft Excel, allowing real-time general ledger data to be formatted into any financial report within the powerful environment of the spreadsheet. With **F9** you can ensure you always get the critical information to manage your business successfully.

Stop wasting valuable time on redundant building and rebuilding of reports. With **F9** you’ll spend that valuable time analyzing financial data and overall business performance. Once a report is designed, recalculating a report is as easy as pushing the **F9** key. If you know Excel, then you know **F9**!

**F9 (Version 5)**

<b>50 Pack Viewer</b>	\$7,500	\$1,500

*F9 (Version 4.x) has been discontinued as of April 30th, 2015. Version 4.x does not support Windows 8, Windows 10 or Microsoft Excel 2013. This puts certain limitations on the size and capabilities of certain reports for many users.*

*With the new release of Version 5.0, F9 addressed these issues and much more! Additionally, INFOR now requires that you must be on their Annual Maintenance Fee (AMF) which is normally 20% of the retail price of the product.*
